

2016 GRESB Real Estate Developer Assessment

April 1, 2016

About GRESB

GRESB is an industry-driven organization committed to assessing the environmental, social, and governance (ESG) performance of real assets globally, including real estate portfolios (public, private and direct), real estate debt portfolios, and infrastructure. Almost 200 members, including 60 pension funds and their fiduciaries, use GRESB data in their investment management and engagement process, with a clear goal to optimize the risk/return profile of their investments. For more information, visit www.gresb.com.

About the 2016 GRESB Developer Assessment

Besides the GRESB Real Estate Assessment for property companies and fund managers that focus on the management of standing investments, GRESB provides a stand-alone GRESB Developer Assessment for organizations that focus on development activities. The Developer Assessment evaluates the ESG performance of these organizations, focusing on policies, strategies, and measurable actions related to new construction and major renovation projects.

The following organizations should fill out the GRESB Developer Assessment:

- Organizations that develop projects, or acquire development projects, with the aim to sell the projects at completion. Projects can be developed to a tenant's specification (build to suit), commissioned by an investment manager, or can be developed at risk;
- Organizations that acquire properties exclusively for redevelopment and resale;
- Organizations that manage standing investments as a by-product of their development activities, and for whom the development activities are considered to be the core business.

Companies reporting to the GRESB Developer Assessment complete a subset of indicators from the GRESB Real Estate Assessment, including the 14 indicators in the New Construction & Major Renovations (NC&MR) Aspect.

The role of the GRESB benchmark

GRESB's global benchmark uses a consistent methodology across different regions, investment vehicles and property types. The GRESB Developer Assessment contains 37 indicators that examine a broad range of ESG topics. The indicators are designed to encompass the specific focus of organizations with development activities and projects.

Based on the Developer Assessment, GRESB provides a Developer Score for each participating company. GRESB recognizes that the real estate sector and the ESG issues that the sector must consider are highly complex and that within countries, regions and property types there are significant variations. Therefore, GRESB

emphasizes both to participants and to real estate investors that the measurement of absolute performance is only a single element of a broad range of indicators reported in the benchmark. The structure of the GRESB Developer Assessment creates the opportunity to report on specific topics using the following logic: policy/plan, actions, monitoring and accountability. The key to analyzing GRESB data is in peer group comparisons, taking into account regional variations.

GRESB aims for the inclusion of its ESG metrics in the investment decision-making processes. Equally important is an active dialogue between investors, and companies and fund managers regarding ESG issues. GRESB provides its Investor Members with an Investor Engagement Guide to assist with this process.

Who can see my data?

Data collected through the GRESB Developer Assessment is disclosed to the participants themselves only, and:

- In the case of non-listed organizations, to those of that organization's investors that are GRESB Investor Members;
- In the case of listed companies, to all GRESB Real Estate Investor Members that invest in listed real estate securities.

Grace Period

GRESB offers property companies and funds reporting for the first-time the option not to disclose their first year Developer Assessment results to their investors – a "Grace Period." This period allows companies and funds a

one-year period to familiarize themselves with the GRESB reporting and assessment process, without externally disclosing their results to GRESB's Investor Members.

Grace Period participant names are disclosed to GRESB's Real Estate Investor Members. However, Investor Members are not able to request access to Grace Period participants' results. Grace Period participants can use the Scorecard and Benchmark Report to identify opportunities to improve their performance for next year's Developer Assessment. Those first-time participants wishing to participate in the Grace Period must select the option when registering to participate in the Developer Assessment.

Timeline & Process

The GRESB Developer Assessment opens in the GRESB Portal on April 1, 2016, alongside the GRESB Real Estate Assessment. The submission deadline is July 1, 2016, providing participants with a three-month window to complete the assessment. This is a fixed deadline, and GRESB will not accept submissions received after this date

GRESB validates and analyses all GRESB Developer Assessment submissions. This process starts upon receipt of the first submission and continues until July 31, 2016. We may need to contact you during this time to clarify any outstanding issues with your response. Results are published on September 7, 2016 and are distributed as follows:

Participants in the GRESB Developer Assessment will receive a Scorecard free of charge. It includes:

- A Developer Score, and comparison and ranking based on all participants in the Developer Assessment:
- A separate score, comparison and ranking of the additional New Construction & Major Renovations Aspect, based on all participants in the Developer Assessment, and on all participants in the GRESB Real Estate Assessment that filled out the New Construction & Major Renovations Aspect;
- On payment of a fee, participants are also able to obtain a Benchmark Report containing an indepth analysis of their ESG performance;
- Company and Fund Manager Members: Receive Benchmark Reports for all of their Developer Assessment submissions and have access to GRESB's Member Portal, which contains additional functionalities enabling them to create their own portfolio analysis;
- Investor Members: Receive Benchmark Reports for all of their investments and have access to GRESB's Member Portal, which contains additional analysis tools enabling investors to create their own reports based on a selection of their investments.

Response Check service

A Response Check is a high-level check of a participant's GRESB Developer submission by the GRESB team, taking place prior to submission of a response. It minimizes the risk of errors that could adversely impact the Developer Assessment results.

The Response Check fee for non-members is €750 (exclusive of VAT). GRESB Members are able to request a complimentary Response Check as one of their membership benefits. Organizations that submit the GRESB Developer Assessment for multiple entities are entitled to a maximum of three Response Checks as part of their membership benefits.

Reference Guide & Support

The 2016 Developer Assessment is accompanied by an indicator-specific Reference Guide that explains:

- The intent of each indicator;
- The requirements for each response;
- Explanation of any terminology used;
- References to any third-party documents;
- Basic scoring information;
- The number of points available.

Developer Content

Entity & Reporting Characteristics	4
Management	9
Policy & Disclosure	11
Risks & EMS	16
Stakeholder Engagement	20
New Construction & Major Renovations	24

The 2016 GRESB Reference Guide materials also include:

- Additional examples of frequently provided valid/non-valid answers, based on 2015 data;
- Details of GRESB's validation process.

The Reference Guide will be available during the first week of March 2016. Guidance per question is also available in the GRESB Portal, through pop-up fields next to each indicator. The GRESB Helpdesk is open year-round to answer questions from participating organizations.

GRESB Training Program for property companies, fund managers, developers, and service providers

GRESB is providing a training program for property companies, fund managers, developers and service providers, during Spring 2016. The GRESB Training Program offers a high-quality and content-rich educational experience addressing all aspects of ESG in real estate portfolios as covered by the GRESB Real Estate Assessment and GRESB Developer Assessment. The training enables participants to assess and enhance their current performance, to more efficiently prepare their GRESB response, and to improve the quality of their submission.

The training program will take place in selected locations in Europe, North America and Asia Pacific. In-house sessions are available upon request. Detailed information about the program is available on the GRESB website.

Entity and Reporting characteristics

Entity Characteristics EC1 Entity name EC1 Fund manager (organization) name (if applicable) Nature of ownership: EC2 Listed entity. Please specify ISIN ______ Year of commencement: Non-listed entity Year of first closing: _____ For non-listed entities: Fund style classification: O Core Value added Opportunity Open or closed end: Open end O Closed end Finite or infinite structure: Finite structure. Specify termination date: Infinite structure The reporting period is: EC3 EC3 Calendar year

Fiscal year. Specify the starting month ______

EC4

Is the organization a member of a real estate association?

- Yes (multiple answers possible)
 - Asian Association for Investors in Non-listed Real Estate Vehicles (ANREV)
 - Asia Pacific Real Estate Association (APREA)
 - British Property Federation (BPF)
 - European Public Real Estate Association (EPRA)
 - European Association for Investors in Non-Listed Real Estate Vehicles (INREV)
 - Vereniging van Institutionele Beleggers in Vastgoed, Nederland (IVBN)
 - National Association of Real Estate Investment Trusts (NAREIT)
 - Pension Real Estate Association (PREA)
 - Real Property Association of Canada (REALpac)
- No

Reporting Characteristics

0	Yes	Yes		
	Select all issues addressed (multiple answers possible)			
		Formal adoption of a policy regarding health attributes and performance of building materials.		
		Formal adoption of a policy regarding the environmental attributes and performance of buildings materials.		
		Requirement for information (disclosure) about building product environmental and health attributes, including requirements for (multiple answers possible)		
		Health and environmental information		
		Environmental Product Declarations		
		Health Product Declarations		
		Other types of health and environmental information		
		Building product specification, including (multiple answers possible)		
		 Preferential specification and purchasing of materials that disclose environmental impacts 		
		 Preferential specification and purchasing of materials that disclose potential health hazards 		
		"Red list" of prohibited materials or ingredients that should not be used on the basis of their human and/or environmental impacts		
		Specification of locally extracted or recovered materials		
		 Specification and purchasing of rapidly renewable materials, low embodied carbon materials, and recycled content materials 		
		Specification and purchasing materials that can easily be recycled		
		 Specification and purchasing of third-party certified wood-based materials and products 		
		Types of third-party certification used:		
		Specification and purchasing of low-emitting materials		
		Other		
	Со	ompliance with specifications		
	De	escribe practices and processes to ensure consistency and compliance with specification		

requirements and preferences (maximum 250 words)

Jeveloper Assessment

NC5.1 Does the entity incorporate green building standards in new construction and major renovation projects?

O Yes

Select all applicable options (multiple answers possible)

■ The entity requires projects to align with requirements of a third-party green building rating system but does not require certification

Select % portfolio covered

▼ > 0%, < 25%
≥ 25%, < 50%

≥ 50%, < 75% ≥ 75%, ≤ 100%

Green building rating systems: include all that apply

The entity requires projects to achieve certification with a green building rating system

Select % portfolio covered

> 0%, < 25%

≥ 50%, < 75%

≥ 25%, < 50%

≥ 75%, ≤ 100%

Green building rating systems: include all that apply _____

The entity requires projects to achieve a specific level of certification

Select % portfolio covered

> 0%, < 25%

≥ 50%, < 75%

≥ 25%, < 50%

≥ 75%, ≤ 100%

Level of certification: include all applicable rating systems ______ Levels adopted as a standard by the entity _____

O No

Not applicable

Developer Assessment

NC5.2	Does the entity's portfolio include new construction and major renovation projects
	that obtained a green building certificate?

O Yes

Specify the certification scheme(s) used and the percentage of the portfolio certified (multiple answers possible)

Projects in progress at the end of reporting period

Scheme name/ sub-scheme name	Level of certification	% portfolio covered by floor area	Number of certified projects
Scheme ▼			
Scheme ▼			
Scheme ▼			

Projects completed during the reporting period

Scheme name/ sub-scheme name	Level of certification	% portfolio covered by floor area	Number of certified projects
Scheme ▼			
Scheme ▼			
Scheme ▼			

Note: A list of provisionally validated certification schemes is provided in the Reference Guide. If you select "other", you will be asked to complete the validation questions for the scheme (see Appendix).

- O No
- Not applicable

Energy Efficiency

- NC6 Does the entity have minimum energy efficiency requirements for new construction and major renovation projects?
 - Yes

The entity promotes energy efficiency through (multiple answers possible)

- Requirements for planning and design include
 - Integrative design process
 - Requirement to exceed relevant energy codes or standards
 - Other ____

NC7.2	Are the entity's new constru net-zero energy codes and/o	ction and major renovation projects designed to meet or standards?	
0	Yes		
	Applicable net-zero standard:		
	Description of the entity	's definition of "net-zero energy" (max 150 words)	
	Description of the applic	cable reference code or standard (max 150 words)	
	Other		
	Percentage of projects covered		
	UPLOAD supporting evidence	Indicate where the relevant information can be found	
0	No		

NC7.1 Does the entity incorporate on-site renewable energy in the design of new

Developer Assessment

Water Conservation and Waste Management

0

NC8 Does the entity promote water conservation in its new construction and major renovation projects?

rei	novation projects?
Yes	
The	e entity promotes water conservation through (multiple answers possible)
	Requirements for planning and design include (multiple answers possible)
	Development and implementation of a commissioning plan
	Integrative design for water conservation
	Requirements for indoor water efficiency
	Requirements for outdoor water efficiency
	Requirements for process water efficiency
	Requirements for water supply
	Other
	Common water efficiency measures include (multiple answers possible)
	 Commissioning of water systems
	Drip/smart irrigation
	Drought tolerant/low-water landscaping
	High-efficiency/dry fixtures
	Leak detection system
	Occupant sensors
	On-site wastewater treatment
	Re-use of stormwater and grey water for non-potable applications
	Other
	Operational water efficiency monitoring (multiple answers possible)
	Post-construction water monitoring for on average years
	Sub-meter
	Water use analytics
	Other
The	e entity's water efficiency measures are required to
0	Meet local requirements
0	Meet above-code standards for some projects. Describe the standards (maximum 150 words)
0	Meet above-code standards for all projects. Describe the standards (maximum 150 words)
0	Meet national or global leadership standards for some projects. Describe the standards (maximum 150 words)
0	Meet national or global leadership standards for all projects. Describe the standards (maximum 150 words)

UPLOAD supporting evidence

- Not applicable

NC9 Does the entity promote efficient on-site solid waste management during the construction phase of its new construction and major renovation projects?

O Yes

The entity promotes efficient solid waste management through

- Management and construction practices (multiple answers possible)
 - Construction waste signage
 - Education of employees/contractors on waste management
 - Incentives for contractors for recovering, reusing and recycling building materials
 - Targets for waste stream recovery, reuse and recycling
 - Waste management plans
 - Waste separation facilities
 - Other _____
- On-site waste monitoring (multiple answers possible)
 - Hazardous waste monitoring
 - Non-hazardous waste monitoring
 - Other

The entity's solid waste management approach is required to

- Meet local requirements
- Meet local requirements Meet above-code standards for some projects. Describe the standards (maximum 150 words)
- Meet above-code standards for all projects. Describe the standards (maximum 150 words)
- Meet national or global leadership standards for some projects. Describe the standards (maximum 150 words)
- Meet national or global leadership standards for all projects. Describe the standards (maximum 150 words)

UPLOAD supporting evidence

Supply Chain NC10.1 Does the entity have sustainability-specific requirements in place for its contractors? Yes Select all topics included (multiple answers possible) Business ethics Community engagement Environmental process standards Environmental product standards Human health-based product standards Human rights On-site health and safety Sustainability-specific requirements for sub-contractors Other Percentage of projects covered _____% UPLOAD supporting evidence O No 2 points, S NC10.2 Does the organization monitor its contractors' compliance with its environmental and social requirements in place for this entity? 0

0	Yes	
	Sel	ect all applicable options (multiple answers possible)
		Contractors provide update reports on environmental and social aspects during construction
		External audits by third party. Percentage of projects audited during the reporting period% by
		Internal audits. Percentage of projects audited during the reporting period%
		Weekly/monthly (on-site) meetings and/or ad hoc site visits. Percentage of projects visited during the reporting period%
		Other
0	No	
0	No	t Applicable

Health, Safety and Well-being

NC11

		es the entity promote occupant health and well-being in its new construction and ijor renovation projects?
,	Yes	
The entity addresses health and well-being in the design of its product through (multiple answers possible):		
		Requirements for planning and design, including (multiple answers possible)
		Health Impact Assessment
		Integrated planning process
		Other planning process
		Common occupant health and well-being measures, including (multiple answers possible)
		Access to spaces for active and passive recreation
		Active design features
		Commissioning
		Daylight
		Indoor air quality monitoring
		Indoor air quality source control
		Natural ventilation
		Occupant controls
		Provisions for active transport
		Other
		Provisions to verify health and well-being performance include (multiple answers possible)
		Occupant education
		Post-construction health and well-being monitoring for on average years (e.g., occupant comfort and satisfaction)
		Other
	The	e entity's occupant health, safety, and well-being measures are required to
(0	Meet local requirements
	0	Meet above-code standards for some projects. Describe the standards [maximum 150 words]
	0	Meet above-code standards for all projects. Describe the standards (maximum 150 words)
(0	Meet national or global leadership standards for some projects. Describe the standards (maximum 150 words)

UPLOAD supporting evidence

O No

Meet national or global leadership standards for all projects. Describe the standards (maximum 150 words)

Developer Assessment

NC12.1	Does the entity promote on-site health and safety during the construction phase of its new construction and major renovation projects?
0	Yes
	The entity promotes on-site health and safety through (multiple answers possible)
	Communicate safety information
	Continuously improve safety performance
	Demonstrate safety leadership
	Entrench safety practices
	Manage safety risks
	Promote design for safety
	Other
	The entity's on-site health and safety measures are required to
	Meet local requirements
	 Meet above-code standards for some projects. Describe the standards (maximum 150 words)
	 Meet above-code standards for all projects. Describe the standards (maximum 150 words)
	 Meet national or global leadership standards for some projects. Describe the standards (maximum 150 words)
	 Meet national or global leadership standards for all projects. Describe the standards (maximum 150 words)
	UPLOAD supporting evidence
0	No
0	Not applicable
NC12.2	Does the organization monitor health and safety indicators at construction sites?
0	Yes
	Select all applicable options (multiple answers possible)
	Injury rate
	Explain the injury rate calculation method (maximum 250 words)
	Fatalities
	Near misses
0	No

)eveloper Assessment

Community Impact and Engagement

NC 13	Does the entity assess the potential socio-economic impact of its new construction and major renovation projects on the community as part of planning and pre-construction?
0	Yes
	Select the areas of impact that are assessed (multiple answers possible)
	Housing affordability
	Impact on crime levels
	Livability score
	Local income generated
	Local residents' well-being
	Walkability score
	Other
	UPLOAD supporting evidence Indicate where the relevant information can be found
0	No
0	construction and major renovation projects on the local community during different stages of the project? Yes
	The entity's process includes (multiple answers possible)
	Analysis and interpretation of monitoring data
	Development and implementation of a communication plan
	Development and implementation of a community monitoring plan
	 Development and implementation of a risk mitigation plan
	Identification of nuisance and/or disruption risks
	Identification of stakeholders and impacted groups
	 Management practices to ensure accountability for performance goals and issues identified during community monitoring
	Other
	Describe the monitoring process (maximum 250 words)
	UPLOAD supporting evidence Indicate where the relevant information can be found

O No

Developer Assessment

Appendix: Green Building Certificates - Validation Questions

THE FOLLOWING QUESTIONS ARE FOR VALIDATION PURPOSES; MANDATORY BUT NOT SCORED

If of	ther	, confirm:
A.		Certification scheme
		a. Certification scheme name b. Certification sub-scheme name c. Certification body name
В.		Country where certification was granted
C.		Is the certification an in-house or external scheme?
		a. In-house certification schemeb. External scheme
D.		Verification of compliance with scheme requirements is based on:
		 a. Third-party document review b. Third-party on-site assessment c. Both document and on-site assessment performed by a third party d. No third-party document review or on-site assessment required
		(NB: If you use an in-house scheme, GRESB will ask for an upload to provide additional information on the scheme. If no third-party document review or on-site assessment required, GRESB will ask for an upload to provide specific information the assessment method)
E.		Does the scheme have a public list of certified projects online?
	0	Yes
		Provide hyperlink
	0	No
F.		Is the scheme required by a national or regional government agency?
	0	Yes
		Specify name of agency
	0	No
G.		Is the scheme used by a national or regional government agency?
	0	Yes
		Specify name of agency
	0	No
Н.		Does the certification require:
		 a. Performance-based design goals for energy efficiency and/or GHG emissions reduction b. Operational performance data for energy efficiency and/or GHG emissions reduction c. Both design and operational goals and data collection d. None
I.		Select the topics included in the scheme assessment: (multiple answers possible)
		 a. Location (e.g., brownfield redevelopment, density, walkability) b. Transportation (e.g., access to public transport) c. Site design (including stormwater management, heat island reduction, etc.)

d. Energy efficiency

e. Greenhouse gas emissionsf. Indoor water conservation

- g. Outdoor water conservation
- h. Waste management (including waste diversion, recycling)
- i. Indoor environmental quality
- **j.** Operations/management
- **k.** Materials selection
- L. Biodiversity and habitat conservation
- **m.** Public health and wellness
- **n.** Social equity
- **o.** Resilience
- J. Use the text box below to provide any additional information about the scheme (maximum 250 words)
